Theme	Indicator or data (A number prefix denotes a national target)	Data provided by	Headline *(and date of data/data provided)* Gaps indicate that data is currently unavailable.	Condition trend (where available) Positive Stable Negative	Link to data and definitions/notes
Nature	1. Extent of wildlife rich habitat created or restored within MHNL, outside of protected sites	Natural England. This Indicator is still in development. Expected to be finalised by July 2025.			Definitions are as per the statutory target set in Environment Act 2021. See Schedule 1, Regulation 10 https://www.legislation.gov.uk/uksi/2023/91/made
Nature	2. Percentage of SSSI features within Protected Landscapes in favourable condition	Natural England	51.4% No. favourable – 19 No. unfav recovering – 13 No. no change – 1 No. unfav declining – 1 Not recorded - 1 *Data provided: 03/03/25* *Date stats relate to: Feb 24*	Not available (not comparable with previously recorded data)	TIN216 Edition 1 Environment Act Interim Target for protected sites - TIN216 (naturalengland.org.uk) (Annex 3 defines what the different feature conditions mean)

Theme	Indicator or data (A number prefix denotes a national target)	Data provided by	Headline *(and date of data/data provided)* Gaps indicate that data is currently unavailable.	Condition trend (where available) **Positive** **Stable** **Negative**	Link to data and definitions/notes
Nature	3. Percentage of SSSIs within MHNL assessed as having 'actions on track' to achieve favourable condition	Natural England	16.2% No. actions on track – 6 No. actions not on track – 31 Total features counted – 37 *Data provided: March 25* *Date stats relate to: Feb 24*	Not available (not comparable with previously recorded data)	[TIN216 Edition 1 Environment Act Interim Target for protected sites - TIN216 (naturalengland.org.uk)](#) (Pages 16-17 explain what 'actions on track' means.)
Nature	4. Extent of priority habitat within MHNL, outside of protected sites, in favourable management through agri-environment schemes	Natural England Data to be provided by Defra Farming and Countryside Programme			Indicator designed to measure how much priority habitat outside SSSIs is being managed for nature via agri-environment schemes.
Nature	Total area of land managed under agri-environment schemes and total value of agri-		2,100ha £294,100 (total claimed value CS and SFI 22) *31/10/24 data revised*	Declining 3,040ha (2018) 5,923ha (2013)	

Theme	Indicator or data (A number prefix denotes a national target)	Data provided by	Headline *(and date of data/data provided)* Gaps indicate that data is currently unavailable.	Condition trend (where available) Positive Stable Negative	Link to data and definitions/notes
	environment schemes				
Nature	5. Percentage of land managers adopting nature-friendly farming on a percentage of their land	Natural England Data to be provided by Defra Farming and Countryside Programme			'Nature friendly farming' (NFF) is defined as 'to farm in a way that is better for nature, but is also a productive and sustainable way of producing food' – i.e. the type of actions that are beneficial for nature but can also be incorporated into typical farming systems and farming business practices. NFF includes active measures that farmers can take to deliver more/better habitats or specific year-round resources, to support farmland wildlife. In this context, it means that farms will adopt actions that are roughly equivalent to options under Higher Level Stewardship or Mid/Higher Tier options in the existing Countryside Stewardship scheme that support farmland wildlife. This will include specific measures to benefit farmland wildlife, by providing the year-round critical resources that are

Theme	Indicator or data (A number prefix denotes a national target)	Data provided by	Headline *(and date of data/data provided)* Gaps indicate that data is currently unavailable.	Condition trend (where available) Positive Stable Negative	Link to data and definitions/notes
					known to limit populations on farmland (e.g. provision of food supplies and places to nest, shelter and hibernate). This can include features that are ephemeral and rotational (e.g. flower rich field margins). Creation, restoration, and maintenance of field boundaries and 'interstitial' habitats within farmland (e.g. hedgerows, ditches, orchards).
Nature	Extent of priority habitat and other habitats and as a % of the NL	Natural England	2,773ha / 26% *Data provided: Jan 25 Date stats relate to: July 24*	Appears declining but probably down to how stats calculated. 3,084ha / 29% (12/2023)	
Nature	Area of land designated at international, national and local level for nature conservation	Natural England	1,199ha (11.02%) *Data provided: Mar 25 Date stats relate to: Dec 24*	11.% (Jan 2024)	

Theme	Indicator or data (A number prefix denotes a national target)	Data provided by	Headline *(and date of data/data provided)* Gaps indicate that data is currently unavailable. Positive Stable Negative	Condition trend (where available)	Link to data and definitions/notes
Nature	Area of woodland within Protected Landscapes under 'sustainable management'	Natural England	1,338.1ha (53.8%) Managed private: 1203.4ha Managed public: 134.7 Unmanaged: 1147.2 *Data provided: Jan 24*		
Nature	Extent of ancient woodland	Natural England	1240 ha (11.6% of PL) 800 ha ASNW (7.5%) 440 ha PAWS (4.1%) *Data provided: Jan 25* *Date stats relate to: May-Sept 24*	11.6% (2023)	
Nature	Ecological status of watercourses and water bodies (length of water bodies)	Natural England	High – 0m Good – 0m Moderate – 21,718m Poor – 837m Bad – 2,980m Total length 25,500m *Data provided: Jan 24*		
Nature	Area of land under different agricultural
